Contents

Keynote Lecture:
Mohamed S. El-Aasser, Mei Li, Pilmoon Jeong, Eric S. Daniels, Victoria L. Dimonie, E. David Sudol — 1
Nano-Hybrid Polymer Particles via the Miniemulsion Process

S. Arrigoni, G. Canil, M. Albano, A. Sanguineti, M. Apostolo — 15
A New Technology for the Dispersion of Nano-Particles of PTFE in a Perfluorinated Elastomer Matrix

G.P. Hellmann, W. Rüger, O. Schacker, T. Ruhl, D. Braun — 23
Thermoplastic Elastomers from Latices and by Reactive Extrusion

A. Wittemann, B. Haupt, X. Guo, M. Ballauff — 31
Fixation of Proteins onto the Surface of Functionalized Polymer Particles

Keynote Lecture:
A. de Vries, N. Izzo-Iammarrone — 43
The Multizone Circulating Reactor Technology

G. J. Wells, W. H. Ray — 49
Investigation of Imperfect Mixing Effects in the LDPE Autoclave Reactor Using CFD and Compartment Models

Z. Grof, J. Kosek, A. Novák, M. Marek — 61
Meso-Scopic Modeling of Morphogenesis of Polyolefin Particles in Heterogeneous Catalytic Reactors

Kevin P. Peil — 71
The Use of Combinatorial Tools in Polymer Reaction Engineering

Keynote Lecture:
G. Kokturk, S.M. Howdle — 79
Supercritical Fluids: New Solvents for Polymer Synthesis and Polymer Processing

P. Pladis, T. Boultouka, C. Kiparissides 99
Free-Radical Polymerization of Vinyl Monomers in scCO2 :
Experimental Studies and Comprehensive Mathematical Modeling

Marco A. Villalobos, Jon A. Debling 107
Modelling and Simulation of Continuous Free Radical Polymer-
ization with Multiple Monomers Exhibiting Reversible Propagation

I. Conrad, S. Kossak, H.-U. Moritz, W.A. Jung, H.-P. Rink 117
Continuous Taylor Reactor for High Solid Coating
Resin Polymerization in Solution

P.D. Iedema E. Fourcade, H.C.J. Hoefsloot, G. van Vliet,
W. Bunge, S.M.P. Mutsers 125
The Influence of Micromixing on Molecular Weight
Distribution during Controlled Polypropylene Degradation
in a Static Mixer Reactor

Knut Zöllner, Kalle Kallio, Karl-Heinz Reichert 135
Kinetic Studies of Gas Phase Polymerization by
Using Videomicroscopy

Christian-Ulrich Schmidt, Frank-Olaf Mähling 147
Model Application in the Polyolefin Industry

J.L. Santos, M. Vecino, E. Ochoteco, M. Montes,
J.M. Asua, J.C. de la Cal 155
Modeling of Olefin Gas-Phase Polymerization in the
MultiZone Circulating Reactor

Keynote Lecture:
Florian Müller-Plathe 163
Molecular Simulation of Polymers: From Concepts to
Industrial Applications

M. Hecker, R. Born, H.-U. Moritz 175
Stochastic Simulation of Polymer Networks:
Insight into Microstructure

Marco Drache, Jens Reichel, Gudrun Schmidt-Naake 183
Simulation of Polymer Aggregates

J.D. Campbell, M. Morbidelli, F. Teymour 191
A Theoretical and Experimental Investigation of High Temperature Polymerization

K. Zhen Yao, Kim B. McAuley 203
Dynamic Mathematical Model for Continuous Solid-Phase Polymerization of Nylon 6,6

Kyu Yong Choi, Boo Gon Woo 219
Novel Melt Condensation Polymerization by Forced Gas Sweeping Process

A. F. Johnson, Z. G. Meszena, S. A. Murphy, K. Sahakaro, 229
Some Aspects of the Role of Mixing on Fast Living Polymerization Processes: Background Studies

K.-D. Hungenberg, C.-C. Chen, F. Zhang, M. Wulkow,
G. Stubbe, U. Nieken 237
Design of Polymer Processes Using the Coupling of Commerci al Simulation Packages POLYMERS PLUS® and PREDICI®

Keynote Lecture:
Nitin H. Kolhapure, Rodney O. Fox 247
CFD in Polymer Reaction Engineering:
Combining Polymerization Chemistry and Detailed Flow Models

A. Butté, G. Storti, M. Morbidelli 273
Living Free Radical Polymerization in Emulsion

F. Joseph Schork, Yingwu Luo 283
Colloidal Stability in Living Free Radical Miniemulsion Polymerization

K. Ouzineb, C. Graillat, T.F. McKenna 293
Continuous Tubular Reactor as a Seed Reactor in Miniemulsion Polymerization

S. Sajjadi, B. W. Brooks 303
Particle Formation in Semibatch Emulsion Polymerisation Reactors

Charles D. Immanuel, Francis J. Doyle III,
Cajetan F. Cordeiro 313
Parametric Sensitivity and Model Validation for Particle
Size Distribution in Emulsion Polymerization

Keynote Lecture:
Arno Tuchbreiter, Bernd Kappler, Josef Honerkamp, Rolf Mülhaupt 323
Combinatorial Chemistry for the Development of New
Catalysts and Polymeric Materials: Prospects and Challenges

Catalytic Polymerization Processes 335

Bo-Geng Li, Lin-Bo Wu, Kun Cao, Bao-Fang Li 337
Styrene Polymerization with Rare Earth Catalyst:
Mechanism and Kinetics

C. Chatzidoukas, B. Gustafsson, A. Yiagopoulos,
H. Yiannoulakis, C. Kiparissides 339
Dynamic Simulation of the BORSTAR Ethylene Copolymerization
Fluidized Bed Reactor

T.F. McKenna, C. Kiparissides, G. Weickert, G. Storti 345
Results of the CATAPOL Project: Advances in Studies
on Single Catalyst/Polymer Particles for Polyolefins

Y. K. Kim, C. K. Oh, K. Y. Choi 353
Modeling of the Slurry Polymerization Process of
Ethylene with Ziegler-Natta Catalyst

Mu-Jen Young, Ruey-Fu Shih, Wen-Sheng Chang,
Chen-Chi M. Ma 361
Polymerization Kinetics and Modeling of Metallocene
Cyclic Olefin Copolymer System

Kun CAO† Yuan HUANG, Bo-geng LI, Bao-fang LI 429
Simulation Study on the Phase Behavior in Multi-Phase Copolymerization of Styrene and Maleic Anhydride onto Rubber

H. G. Becker, G. Schmidt-Naake 441
New Reactive Blends through Oxazoline-Modification of Poly(Styrene-Co-Acrylonitrile)

Pham Thi Bich Hanh, Do Truong Thien 449
Adsorption of Metal Ions by Graft Copolymer of Acrylic Acid on Biopolymer Squid Chitin

Polymerization at Supercritical Conditions, Bulk Polymerization, Solution Polymerization and Suspension Polymerization 457

Eduardo Vivaldo-Lima, Iraís A. Quintero-Ortega, Gabriel Luna-Bárcenas 459
On the Development and Validation of a Mathematical Model for the Free-Radical Copolymerization Kinetics with Crosslinking of Styrene/Divinylbenzene in Carbon Dioxide at Supercritical Conditions

Ulrich Fehrenbacher, Oliver Muth, Th. Hirth, Matthias Ballauff 465
The Kinetics of the Early Stage of Dispersion Polymerization in Supercritical CO_2

Anny Rosell, Giuseppe Storti, Massimo Morbidelli 467
Dispersion Polymerization of Methyl Methacrylate in Supercritical Carbon Dioxide

F. Falcotet, F. Besançon, Th. Meyer 475
Study of a Continuous Process for the Production of Solid Epoxide Resins

A.P. Nising, T. M. Zeilmann, Th. Meyer 481
Thermal Stabilization, Degradation Kinetics of PMMA in a Continuous Polymerization Process

Anny Rosell, Giuseppe Storti, Massimo Morbidelli 487
Reaction Propagation in Frontal Polymerization

P.-A. Fleury, J. List 495
Continuous Kneader Reactor for the Production of
Solid Granular Polymers

Lian-Fang Feng, Xue-Ping Gu, Jia-Jun Wang, Kai Wang,
Guo-Hua Hu 509
Engineering Aspects for Vinyl Acetate/Methanol
Solution Polymerization

G. Schmidt-Naake, C. Taube, M. Drache 517
Control of Macromolecular Structure through N-Oxyle
Controlled Free Radical Polymerization

S. Erwin, H.-U. Moritz, P. Klostermann, H. Kerber 525
Development of a Production Process for Acrylate
Copolymers at Increased Temperature

R. Ditz, M. Häberl, F. Eisenbeiß, J. Kinkel, 531
Microreactors for Porous Particle Generation by
Suspension Polymerization – Options – Opportunities – Obstacles

U. Budde, M. Gottfried, K. Lovis, H.-U. Moritz 533
Gas-Filled Microspheres via Anionic Polymerization in
Dispersed Phase

Giuseppe Maschio, Isabella Ferrara, David G. Lister 543
Determination of the Heat Transfer Coefficient in
Polymerization Reactors by Temperature Oscillation Calorimetry

Theoretical Tools 551

L. K. Gallos, C. Kiparissides 553
An Improved Gibbs Ensemble-Monte Carlo Method
for Phase Equilibria Calculations in Polymer Mixtures

A. A. Kiss, C. S. Bildea, A. C. Dimian, P. D. Iedema 561
Non-Linear Behaviour of CSTR-Separator-Recycle
Polymerization Systems

R. G. Gosden, K. Sahakaro, A. F. Johnson, J. Chen,
R. F. Li X. Z. Wang, Z. G. Meszena 573
Design of Molecular Weight Distributions of Polymers
from Living Polymerization Processes using Neural Networks

M. Busch, M. Wulkow 581
Modeling Multi-Coordinate Problems in Polymerization
Systems

Tarek M. Madkour, Sahar K. Mohamed, Abdalla M. Barakat 589
Molecular Dynamics Simulation of the Diffusion
Properties of Polysilane and Polysiloxanes

R. Bachmann, R. Born, M. Hecker H.-U. Moritz, H.R. Winkelbach 591
Branching and Networkformation in Polymers –
Comparison of Monte-Carlo Simulations, Methods of
Moments and Detailed Description of the MWD

Selwa Ben Amor, Francis J. Doyle III, Randall McFarlane 599
Online Optimization and Control of Polymerization
Reactors using ROMeo™

Emulsion Polymerization 607

A.Santos, F. Bentes-Freire, S. Ben Amor, J.C. Pinto,
R. Giudici, T.F. McKenna 609
Online Monitoring of Emulsion Polymerization:
Conductivity and "Cascade" Calorimetry

M. Schneider, I. Betrémieux, A.Guyot, T.F. McKenna 617
High Solids Content Emulsions: Product Development
and Rheological Characterisation

Mauri Palma, Claudia Sayer, Reinaldo Giudici 625
A New Continuous Reactor for Emulsion Polymerization: Effect of Operational Conditions on Conversion and Particle Number

J. Meuldijk, C.A. Scholtens, X.E.E. Reynhout, A.A.H. Drinkenburg 633
Polymer Latex Production: from (Semi-)Batchwise to Continuous Operation

John W. Ma, Jodi A. Smith, Michael F. Cunningham, Kim B. McAuley 641
Mechanistic Model Simulations of Alkoxyamine-Initiated Styrene Stable Free Radical Polymerization in Miniemulsion

P.H.H. Araújo, O. Araujo, R. Giudici 653
Optimization of Vinyl Acetate Emulsion Polymerization Reactions. Effect of Operational Conditions on Molecular Weight

S. Massebeuf, C. Fonteix, L. N. Kiss, F. Pla 661
New Decision Making Approach Applied to Multicriteria Optimization of Emulsion Polymerization Processes
