Abbreviations XIII

- 1 Introduction 1
- 2 Enzyme Nomenclature 5
- 3 Enzyme Reactions 7
 - 3.1 Theory of the Enzyme Reaction 7
 - 3.1.1 Reaction Order 7
 - 3.1.1.1 Zero-order Reactions 8
 - 3.1.1.2 First-order Reactions 8
 - 3.1.1.3 Second- and Higher-order Reactions 9
 - 3.2 Michaelis–Menten Equation 10
 - 3.3 Theory of the Enzyme Assay 16
 - 3.3.1 Analysis of Progress Curves 16
 - 3.3.2 How To Develop an Enzyme Assay 21
 - 3.3.2.1 General Considerations 21
 - 3.3.2.2 pH 22
 - 3.3.2.3 Ionic Strength and Buffer 23
 - 3.3.2.4 Temperature 23
 - 3.3.2.5 Special Components 24
 - 3.3.2.6 Concentration of Components and Technical Implications 26
 - 3.3.3 Enzyme Activity 28
 - 3.3.3.1 Definition of Enzyme Units 28
 - 3.3.3.2 Absorption Coefficient 28
 - 3.3.3.3 Calculation of Enzyme Activity 29
 - 3.4 Theory of Coupled Enzyme Reactions 32
 - 3.4.1 Two Coupled Reactions 32
 - 3.4.2 Three Coupled Enzyme Reactions 35
 - 3.5 Substrate Determination 35
 - 3.5.1 End-point Method 35
 - 3.5.2 Coupled Enzyme Reactions 37
 - 3.5.3 Kinetic Method for Substrate Determination 38

- 3.7.5.3 Pyruvate Dehydrogenase (Lipoamide) 86
- 3.7.5.4 Dihydrolipoamide Acetyltransferase 88
- 3.7.5.5 Dihydrolipoamide Dehydrogenase 90
- 3.7.6 α -Oxoglutarate Dehydrogenase Complex (OGDHC) 91
- 3.7.6.1 Overall Activity by NAD^+ Reduction 92
- 3.7.6.2 α -Oxoglutarate Dehydrogenase 93
- 3.7.7 Transferases 94
- 3.7.7.1 Fatty Acid Synthase 94
- 3.7.7.2 Phosphorylase a 95
- 3.7.7.3 Hexokinase 96
- 3.7.7.4 Pyruvate Kinase 97
- 3.7.7.5 Acetate Kinase 98
- 3.7.7.6 3-Phosphoglycerate Kinase 99
- 3.7.8 Hydrolases 100
- 3.7.8.1 Lipase 100
- 3.7.8.2 Cholinesterase 102
- 3.7.8.3 Acetylcholinesterase 104
- 3.7.8.4 Alkaline Phosphatase 105
- 3.7.8.5 Acid Phosphatase 106
- 3.7.8.6 Ribonuclease (Pancreatic) 107
- 3.7.8.7 α -Amylase 108
- 3.7.8.8 Amyloglucosidase 109
- 3.7.8.9 Lysozyme 109
- 3.7.8.10 α -Glucosidase 110
- 3.7.8.11 β -Galactosidase 112
- 3.7.8.12 β -Fructosidase 113
- 3.7.9 Proteases 113
- 3.7.9.1 Anson Assay 114
- 3.7.9.2 Casein Assay 116
- 3.7.9.3 Azocasein Assay 117
- 3.7.9.4 Ninhydrin Assay 117
- 3.7.9.5 Leucine Aminopeptidase 119
- 3.7.9.6 Chymotrypsin 119
- 3.7.9.7 Pepsin 121
- 3.7.9.8 Trypsin 122
- 3.7.9.9 Asparaginase 122
- 3.7.9.10 Urease 123
- 3.7.9.11 Adenosine Triphosphatase 125
- 3.7.10 Lyases 126
- 3.7.10.1 Pyruvate decarboxylase 126
- 3.7.10.2 Aldolase 127
- 3.7.10.3 Anthranilate Synthase 127
- 3.7.10.4 Carbonic Anhydrase 128
- 3.7.10.5 Fumarase 129
- 3.7.11 Isomerases 130

- 3.7.5.3 Pyruvate Dehydrogenase (Lipoamide) 86
- 3.7.5.4 Dihydrolipoamide Acetyltransferase 88
- 3.7.5.5 Dihydrolipoamide Dehydrogenase 90
- 3.7.6 α -Oxoglutarate Dehydrogenase Complex (OGDHC) 91
- 3.7.6.1 Overall Activity by NAD^+ Reduction 92
- 3.7.6.2 α -Oxoglutarate Dehydrogenase 93
- 3.7.7 Transferases 94
 - 3.7.7.1 Fatty Acid Synthase 94
 - 3.7.7.2 Phosphorylase a 95
 - 3.7.7.3 Hexokinase 96
 - 3.7.7.4 Pyruvate Kinase 97
 - 3.7.7.5 Acetate Kinase 98
 - 3.7.7.6 3-Phosphoglycerate Kinase 99
- 3.7.8 Hydrolases 100
 - 3.7.8.1 Lipase 100
 - 3.7.8.2 Cholinesterase 102
 - 3.7.8.3 Acetylcholinesterase 104
 - 3.7.8.4 Alkaline Phosphatase 105
 - 3.7.8.5 Acid Phosphatase 106
 - 3.7.8.6 Ribonuclease (Pancreatic) 107
 - 3.7.8.7 α -Amylase 108
 - 3.7.8.8 Amyloglucosidase 109
 - 3.7.8.9 Lysozyme 109
 - 3.7.8.10 α -Glucosidase 110
 - 3.7.8.11 β -Galactosidase 112
 - 3.7.8.12 β -Fructosidase 113
- 3.7.9 Proteases 113
 - 3.7.9.1 Anson Assay 114
 - 3.7.9.2 Casein Assay 116
 - 3.7.9.3 Azocasein Assay 117
 - 3.7.9.4 Ninhydrin Assay 117
 - 3.7.9.5 Leucine Aminopeptidase 119
 - 3.7.9.6 Chymotrypsin 119
 - 3.7.9.7 Pepsin 121
 - 3.7.9.8 Trypsin 122
 - 3.7.9.9 Asparaginase 122
 - 3.7.9.10 Urease 123
 - 3.7.9.11 Adenosine Triphosphatase 125
- 3.7.10 Lyases 126
 - 3.7.10.1 Pyruvate decarboxylase 126
 - 3.7.10.2 Aldolase 127
 - 3.7.10.3 Anthranilate Synthase 127
 - 3.7.10.4 Carbonic Anhydrase 128
 - 3.7.10.5 Fumarase 129
- 3.7.11 Isomerases 130

3.7.11.1	Glucose/Xylose isomerase	130
3.7.12	Determination of Nicotinamide Nucleotides by Enzymatic Cycling	133
3.7.12.1	Determination of NADP(H)	133
3.7.12.2	Determination of NAD(H)	135
3.8	Diverse Methods	136
3.8.1	Protein Determination	136
3.8.1.1	Biuret Method	136
3.8.1.2	BCA Assay	137
3.8.1.3	Lowry Assay	139
3.8.1.4	Coomassie Binding Assay (Bradford Assay)	140
3.8.1.5	Absorption Method	141
3.8.1.6	Fluorimetric Assay	145
3.8.1.7	Ninhydrin Assay	146
3.8.1.8	Modified Ninhydrin Assay for Protein Determination without Hydrolysis	147
3.8.1.9	Protein Determination with 2-Hydroxy-1-naphthaldehyde	148
3.8.2	Phosphate Determination	149
3.8.3	Concentration of Enzyme Solutions	149
3.8.3.1	Precipitation	150
3.8.3.2	Ultrafiltration and Dialysis	153
3.8.3.3	Ultracentrifugation	154
3.8.3.4	Lyophilization	154
3.8.3.5	Miscellaneous Techniques	155
3.9	Enzyme Immunoassays	156
3.9.1	Non-competitive Solid-phase Enzyme Immunoassay	156
3.9.2	Competitive, Solid-phase Enzyme Immunoassay	157
3.9.3	Methods for Enzyme Immunoassays and Immobilization Techniques	157
3.9.3.1	Protein Coupling to Cyanogen Bromide-activated Agarose	157
3.9.3.2	Coupling of Diaminohexyl Spacer	159
3.9.3.3	Periodate Activation of Cellulose	159
3.9.3.4	Conjugation of Proteins (Antibodies) to Enzymes (Peroxidase)	160
3.9.3.5	Introduction of Thiol Groups into Antibodies or Proteins	161
3.9.3.6	Conjugation of β -galactosidase to Antibodies by MBS	161
3.9.3.7	Conjugation of Alkaline Phosphatase to Antibodies by Glutaraldehyde	162
3.9.3.8	Cross-linking of Proteins with Dimethyl Suberimidate	162
4	Binding Measurements	165
4.1	Irreversible, Reversible, Specific, and Unspecific Binding	165
4.1.1	General Considerations	165
4.1.2	Experimental Aspects	167
4.1.2.1	Amount of Enzyme or Macromolecule	168
4.2.1.2	Stability of the Enzyme or Macromolecule	168
4.1.2.3	Stability of the Ligand	168

- 4.1.2.4 Concentration of Components 169
- 4.2 Binding Measurement by Size Discrimination 170
 - 4.2.1 Ultrafiltration 170
 - 4.2.2 Equilibrium Dialysis 171
 - 4.2.2.1 Determination of Indole Binding to Bovine Serum Albumin 172
 - 4.2.3 Evaluation of Binding Experiments 175
 - 4.2.4 Gel Filtration 177
 - 4.2.5 Ultracentrifugation 179
- 4.3 Spectroscopic Techniques 180
 - 4.3.1 Difference Spectroscopy 181
 - 4.3.1.1 Difference Spectroscopic Determination of Binding of Ligands to Catalase 183
 - 4.3.1.2 Evaluation of Spectroscopic Binding Curves 188
 - 4.3.2 Fluorescence Spectroscopy 189
 - 4.3.2.1 ANS Binding to Bovine Serum Albumin 191
- 4.4 Other Methods for Binding Measurements 195
 - 4.4.1 Radioactive Labeling 195
 - 4.4.2 Reflectrometric Interference Spectroscopy 196
- 5 Enzymes in Technical Applications 197**
 - 5.1 Principles of Enzyme Immobilization 198
 - 5.1.1 Adsorption 199
 - 5.1.2 Entrapment 199
 - 5.1.3 Encapsulation 200
 - 5.1.4 Cross-linking 201
 - 5.1.5 Covalent Binding to Solid Supports 201
 - 5.1.5.1 Supports 201
 - 5.1.5.2 Spacer 203
 - 5.2 Methods for Enzyme Immobilization 204
 - 5.2.1 Microencapsulation inside Nylon Beads 205
 - 5.2.2 Entrapment in Polyacrylamide 205
 - 5.2.3 Covalent Immobilization of Enzymes on Nonporous Glass Surfaces 207
 - 5.2.4 Immobilization on Controlled-pore Glass 209
 - 5.2.5 Covalent Immobilization of Enzymes to Polyamide 211
 - 5.2.6 O-Alkylation with Triethylxoniumtetrafluoroborate 212
 - 5.2.7 Immobilization of Enzymes to Amine Groups after Partial Hydrolysis of Polyamide 216
 - 5.2.8 Immobilization of Enzymes to Carboxyl Groups after Partial Hydrolysis of Polyamide 217
 - 5.2.9 Immobilization of Enzymes to Polyester 218
 - 5.2.10 Immobilization by Alkaline Hydrolysis and Activation with Tosylchloride 220
 - 5.2.11 Alkaline Hydrolysis and Activation by Carbonyldiimidazol 221
 - 5.3 Analysis of Immobilized Enzymes 222
 - 5.3.1 Protein Assays 222

5.3.2	Enzyme Assays	222
5.3.2.1	Modified Optical Assay for Immobilized Enzymes	223
5.3.2.2	Cofactors in Reactions with Immobilized Enzymes	224
5.4	Enzyme Reactors	225
5.4.1	Batch Reactor (Stirred-tank Reactor)	226
5.4.2	Membrane Reactor	226
5.4.3	Solid-bed Reactor	227
5.4.4	Immobilized Cells	227
5.5	Biosensors	228
5.5.1	Enzyme Electrodes	228
5.5.2	Immuno-electrodes	232
5.5.3	Other Biosensors	233
5.5.4	Bioaffinity Sensors	233
5.6	Immobilized Enzymes in Therapy	234
